CASE STUDIES

PURPOSE
The purpose of this Information Bulletin is to advise that the policy guideline
GL2005_068 Breastfeeding – Promotion and Supporting in NSW: Case Studies has
been made obsolete.

KEY INFORMATION
A literature review was undertaken for the 2017/18 revision of PD2011_042
Breastfeeding in NSW: Promotion, Protection and Support.

The most recent evidence regarding the short-term and long-term health, economic and
environmental benefits to infants, women, families and communities has been
incorporated into PD2018_034 Breastfeeding in NSW: Promotion, Protection and
Support. The policy was published on 21 September 2018.

This evidence supports strategies and interventions to promote, protect and support
breastfeeding.
